

Silencer

with fine filter

technically oil-free exhaust

When compressed air escapes into the atmosphere, it produces noise. This can be prevented by installing a silencer.

These dampers are provided with a porous filter element. The air flows through the material and is distributed, reducing the noise level.

Exhaust silencer with fine filter, technically oil-free exhaust

No oil in the air outlet - technically oil-free

Noise reduction:

up to max. 69 dB (A)

Temperature range:

-20 °C bis + 100 °C

Operating Pressure:

max. 6 bar
