

Slow motion

Mavel

Article nr.: MAVSLOWRETURN

Brand: Mavel

Material: Plastic

Suitable for the : Roll Major Plus

In normal reels, the cable returns to its seating quickly and uncontrollably, requiring the operator to accompany it, which means time wasted. To help resolve this issue, in 2010 Mavel - a manufacturer of high-quality reels, designed and patented the very first and one-of-a-kind external device that can be easily installed and removed.

A simple yet ingenious idea. Slow Motion is in fact an optional, high-performance device that controls and slows down rewinding, in a uniform manner, thereby eliminating jerking and whiplash. The result? Improved safety, a tidier working environment, and less time wasted.

Mavel Slow Motion: easy to install, practical to use, simple to replace.

What is it?

It's an optional patented device, fruit of MAVEL technology and research. It's so simple that it's ingenious. It's unique.

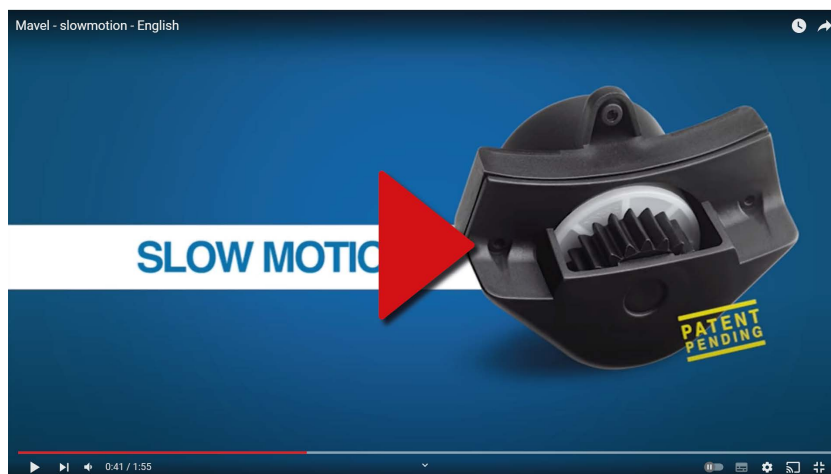

What does it do?

It makes it possible to slowly and uniformly wind cables and hoses without jerking or whiplash. It guarantees increased safety, better organisation, and higher productivity in the workplace. Zero damage to property and no personal injuries.

Where can it be installed?

It can be installed on all models of MAVEL cable and tube reels bearing the symbol [slow motion] It's easy to install and practical to use.
