

# Wall brackets

with thread connection - Pneuparts

## Function:

The wall brackets with threaded connection are screwed on at the beginning and end of the service unit for fastening of Pneuparts servicing units. They allow a replacement of the units without removing the wall fastening and piping. They fit on all thread sizes of the respective model series regardless of their respective thread size.

## Scope of delivery:

1 pc. contains a left and a right wall bracket incl. screws.
