

# 5/2 way valves

## standard version

### Valves

#### Function

TVS18RV type (reaction: delayed, backwash filter: immediately): A continuous signal at connection X triggers the switching of the valve according to the time set. If no signal is at connection X, then the valve switches back to the initial position.

TVS18TV type (reaction: immediate, backwash filter: delayed): A continuous signal at the connection X triggers an immediate switching of the valve. The valve switches back to the initial position according to the time set. If no signal is at connection X, then the valve also switches back to the initial position.

Article number	Optimal flow	Workload	Thread	Time range	Function	Weight
<b>TVS18RV</b>	5/2	4 mm	M5	min. 10 (MS)	Response delayed	290 g
<b>TVS18TV</b>	5/2	4 mm	M5	min. 10 (MS)	Restoration delayed	290 g
