

Reduction valve

FLIP FLOP

Binary valve 5/2 way

Temperature range:
-10°C to + 60°C

Operating pressure:
2-10 bar (control pressure: 3 - 10 bar)

Function

The valve switches following every incoming signal to the pilot entry (Flip-Flop). The last switching position remains even after complete venting of the valve.

Article number	Actuating pressure	Workload	Thread	Signal duration	Weight
