

## Technical information

### Dust system valves

Dust system valves for automatic cleaning from filter systems

#### Valves types:

G 3/4" 9000 N L/min

G 1" 11000 N L/min

G 1 1/2" 15.000 N L/min

Electric actuated

#### Data

The Polyarylamide dust system valve is electric. The valve has a Orifice (DN) from 22 mm. G 1 1/2" thread and a flow from 9000 liters per minute. The minimal pressure is 1 bar and the maximum pressure is 8 bar. The ambient temperature from the dust system valve is from -20°C to +80°C and the medium temperature is from +30°C to +90°C. The switch time is 25 ms.
