

Silencer

plastic

G 1/8" to G 1"

A polyethylene silencer (also known as a PE silencer) is a silencer made of polyethylene plastic used in pneumatic systems to reduce noise pollution from escaping compressed air.

Features:

Material: Polyethylene (lightweight, wear resistant, corrosion resistant)

Application:

Screws onto exhaust ports of valves, cylinders or other pneumatic components

Noise reduction:

Significantly reduces the noise of escaping air

Additional benefit:

Can also filter dust and dirt from the system

Common types:

Thread design: M5, 1/8", 1/4", 3/8", 1/2", etc.

Shape:

Cylindrical, conical or with hexagonal base

| ARTICLE NUMBER | Thread (A) | Diameter (D) | Length (L) |
|----------------|------------|--------------|------------|
| S18PE | G 1/8" | 15 | 35.6 |
| S14PE | G 1/4" | 19 | 57 |
| S38PE | G 3/8" | 33.3 | 77.8 |
| S12PE | G 3/4" | 43 | 87 |
| S34PE | G 1/8" | 44.5 | 119 |
| S10PE | G 1" | 55 | 125 |
