

Special seals

for quick couplings

Materials:

O-ring: FKM, covering: PTFE (completely closed) meets the requirements of Regulation FDA 21 CFR 177.1550

Temperature range

-20°C to +200°C

Advantages:

- No touching materials with elastomer cores as a result of the seamless coating.
- Easy installation of the seal due to the flexible PTFE centring ring.
- Universal chemical resistance (as opposed to welded FEP-covered seals),
- Low friction coefficient (6 x lower than FEP / PFA)

Outside diameter

35 mm to 120 mm

Orifice DN

20 (3/4") to 90 (4")
